

Wine Blending Experience with Lunch

We kick start the journey with a tour of our cellar where our Wine Ambassador will guide the guests through the process of winemaking. Guest then get to enjoy & participate in an informative Wine Tasting followed by an interactive and hands-on wine blending activity. The wine tasting part of the journey allows participants to get to understand single varietals and how they can be used to form a component in a wine blend, adding either structure, fruit, finesse or body to create a well-balanced wine.

The Allée Bleue Wine Ambassador will guide guests through the process showing how and why certain varieties harmonise better than others. After corking their bottle, guests can then enjoy their own individually blended wine at home - a beautiful memento from the day. The duration for this activity/Journey will be approximately 1 ½ hours depending on the size of the group.
